

XO LADDERSPAN

The XO Towers is a smart platform scaffold for professionals in all industries that includes a modular platform tower system that is adaptable for use on both indoor and outdoor projects.

The ladder-equipped tower system makes it possible to safely ascend and descend to the working area. For the XO towers system, a variety of 0.85m and 1.45m frame widths in 1.8m or 2.5m platform lengths are available.

Our advanced design places diagonal bracings between frame joints to evenly distribute the load for better balance, while every platform is secured with standard guardrails for maximum safety.
